DETAILED ACTION

This is responsive to Applicant's amendment filed on 6/21/05.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 13-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yokomachi et al [USPAT 5,483,608] and in view of Helmer [USPAT 3,885,205].

Yokomachi et al disclose an optical switch for switching plural optical fibers and the method comprising:

A platform 20 [fig. 15] that pivots about an axis of rotation, and having a range of motion that includes a stowed position and a deployed position;

A hard stop 19c [as shown in fig. 15] proximate the platform 20, thereby defining the deployed position;

A motor 19 having an actuator arm [element between 19 and 19c]; and

A push/pull spring 32 [fig. 15] operatively coupling the platform to a motor assembly, and adapted to preload the platform against the hard stop, thereby holding the platform in the first position despite opposing forces.

Yokomachi et al disclose every aspect of claimed invention except for the rotating motor assembly.

Helmer discloses a controlled rotating motor.

It would have been obvious to the ordinary skilled person in the art at the time the invention was made to modify Yokomachi et al device to include the Helmer's rotating motor for the purpose of controlled variable speed and constant torque [Helmer's abstract]. It is clear this improve the Yokomachi et al device.

With respect to claims 14 and 15, Yokomachi et al show in Fig. 27 a controller 31, which commands deployment and non-deployment of the optic.

With respect to claims 16, 17, 19, and 20, Yokomachi et al show in fig. 1 a sensor 13, and a linear encoder 14.

Allowable Subject Matter

Claims 1-12 are allowed.

Claim 22 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art does not disclose or suggest an optic switching system comprising all the specific components with the specific combination including a clip adapted to couple around the elongated strip having an open-ended loop as set forth in claims 22.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
